

## Recipe Optimisation and Quality Assurance of Margarine and similar Products

### Recipe Optimisation

Least cost calculation of raw material composition

Consideration of quality aspects like PUFA, TFA, SFC etc.

Cost ranging of raw materials

Utilisation of new raw materials

Cost of quality constraints, e.g. limitation of trans FA

Development of new products

Optimisation of SFC profile

Composition of interesterified products

### Quality Assurance

Recipe adjustment owing to quality deviation of a raw material

Substitution of a raw material by others

Utilisation of a new raw material

Adjustment of quality criteria like PUFA, TFA, SFC profile

Full specification and quality management facilities

Full audit trail of production recipes, specifications, and ingredient properties
